

Fast and easy. That's how to install a Perspective™ multi-slide vinyl patio door

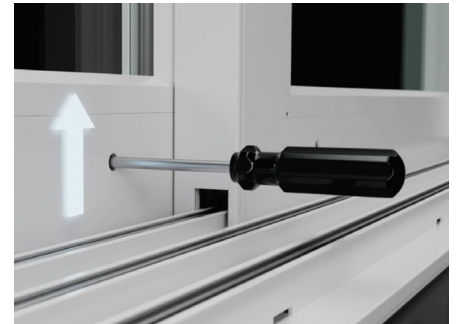

It's the morning of the install, and you're leafing through overly complicated instructions, scrambling to find missing hardware and parts, and discovering mis-aligned door panels. There's nothing more frustrating. We hear you. With precise and consistent build quality, innovative design, and modular components, a Perspective™ multi-slide vinyl patio door by Ply Gem® eliminates these on-site hassles and headaches, providing exceptionally easy and fast installation with less guesswork, measuring and adjustment.

- **Pre-drilled installation holes:** Ensures precise door alignment, eliminates the need for on-site measuring and drilling, and replicates fastener locations made during initial product testing for compliance with building codes

- **Always square:** Frame corners are assembled with two to three times more fasteners than most competitors to keep the frame square during installation

- **Easy adjustment:** Self-leveling rollers adjust into place with a turn of a screw. Lifting or using a pry bar is usually not needed. Rollers are also included on stationary door panels to assist with adjusting door panel height to maintain an even sightline

Everything looks better with some Perspective™.

BENEFITS FOR INSTALLERS

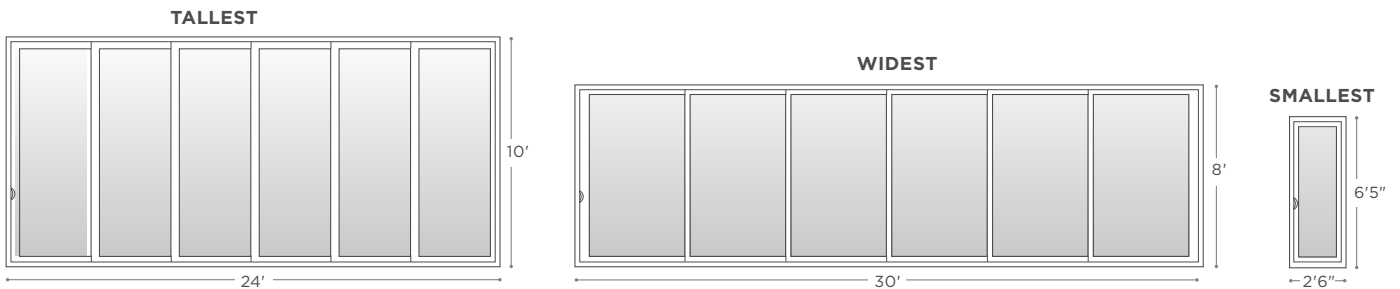

- **Less guesswork:** The keeper locator marks the precise location of the keeper installation screws, eliminating guesswork and reducing installation time

- **Modular packaging:** Frame pieces and door panels are packed and shipped together with the hardware kit and match the bill of materials for a customer's order. Convenient handles make door panels easier to unload and carry

- **Color-coded simplicity:** Hardware is clearly labeled and enclosed in color-coded bags that correspond to specific installation steps detailed in the instructions

- **Design flexibility:** Doors are available in standard sizes, custom sizes from 30' wide to 10' tall, and in pocket, bi-parting and bypass configurations

A Perspective™ multi-slide vinyl patio door is the fast, easy way to install beauty and performance. It's a smart solution—and a better build—for any project.
